What is your forecast on Canadian Sales through Wholesale Distribution for the following products in 2012 - Comments?

Wholesalers:

The CanaData ICI new construction starts shows a softening trend. This is the basis of the conservative forecast at this point. (Respondent indicated -3% to 3% in all product categories).

Manufacturers:

Economy still slow and no signs of things picking up. 2012 will be slightly better but still below what we have all been experiencing over the last 2-3 years.
